EXPERIENCE

Nfinity Studios - *Freelancer Front-end Developer*

Feb 2024 - Aug 2024

- I have worked as a full-time frontend developer for about 6 months for building innovative web3 AI application called NfinityAI .
- Build seamless UI/UX with Svelte and implemented crypto currency wallet integration using WAGMI
- This career was super excited for me and I think it was my proud of career.

Deveron LLC, Costa Rica - *Freelancer Front-end Developer*

Aug 2022 - Jan 2023

- I have worked as a full-time frontend developer for about 7 months for building casino betting web application called Julebet .
- Build seamless and modern UI/UX with Nuxt.
- This career was super excited for me and I think it was my proud of career.

BAP Software, Japan - *Full Stack Developer*

Mar 2021 - Mar 2022

- Established the micro-service for the online software marketing platform using Node.js, making the rapid delivery of software with a resulting 13% revenue increase.
- Produced a scalable payroll system throughout both front and back-end side using HTML/CSS, JavaScript/Typescript, Django, and React.js/Next.js to effectively manage employees and reduce company costs by 3%.
- Reducing response times by 20% using Redis caching for quicker data retrieval.

Luvina JSC, Da Nang City - *Full Time Freelancer*

Oct 2017 - Aug 2020

- As a full time freelancer, I have participated in various web projects.
At that time, I learnt lots of tech and especially I have gained lots of experiences in React, Vue, Svelte, Angular, Node.js, Python/Django and Java.
Also I learnt team collaboration, tips of project architecture, implementing high-quality code base etc.
As a result, I have grown to a full stack developer.

EDUCATION

Danang University of Science and Technology, Da Nang, Vietnam - *Engineer's degree of Information Technology*

Apr 2010 - Oct 2015
